

Navigating A Changing World

Biodiversity and Climate Change

Discussion Questions

Pre-viewing questions:

1. What is mass extinction? When was the most recent mass extinction?
2. Do you value plants and animals you may never directly experience? Why?
3. Many species have gone extinct during the history of Earth. Why is there concern about the current extinctions?

Post-viewing questions:

4. Why is biodiversity important?
5. What is the relationship between climate and biodiversity?
