

Navigating A Changing World Pursuing Passions, Solving Problems, and Seeking Hope in the Anthropocene

Discussion Questions

Pre-viewing questions:

1. What do you think a well-rounded climate change education should entail?

Post-viewing questions:

2. Why is it important for educational institutions to offer programs and courses related to climate change?
3. Why would a student want to study climate change? Why can citizens pursuing professions not involving science and activism benefit from an education in climate change?
4. Describe actions a student interested in climate change solutions can take to benefit her/his community.
